

How to Protect yourself against **Phishing Attacks**

What is Phishing?

A type of fraud in which emails pretending to be from reputable companies trick the victims into providing personal information.

Check the Sender's address. Look for a legitimate email address.

Is the Email personalized and does it address you by name?

Check for typos and poor grammar.

Hover over the link and verify the link's actual destination

Never respond to verbiage that says "Urgent" or "Final Notice"

Make sure the website you visit has the green pad lock icon
